"Over the Top content delivery demo"

Here's to your business success!

Over the Top delivery mechanisms of content are gaining more and more attention amongst clients and professionals over the world. nangu.^{TV} is proudly announcing, that Over the Top feature will be demonstrated during IPTV World Forum 2009 in Prague (21 and 22 October 2009).

We will demonstrate support for downloading encrypted and non encrypted content (protected with Verimatrix DRM in this case) to the Flash USB storage device connected to the brand new Motorola VIP 1903 Set Top Box. User can even watch the content during the download. Background content prefetching was completely developed in-house.

Do not miss this unique opportunity to see the Over the Top demo and other fresh features of nangu.^{TV}, including:

\# brand new icon based STB GUI

\# fast responsiveness of the new GUI

\# middleware integrated mosaic features, suitable for premium channel up-sale.

nangu.^{TV} represents complete Interactive TV solution for service providers including in house developed streaming and storage part.
