

Brasília Institute of Technology and Innovation is pleased to announce its support for the 5th International SOA, Cloud + Service Technology Symposium

The IBTI is the only SOA Licensed Training Institute in the region of Brazil at this time. The Institute aims to carry out research projects in the field of ICT, providing an environment of scientific research and development, pursuing the deployment of new techniques and processes in the field. The organization is involved in promoting the link between university, business and government, provides an environment of scientific research and development, aiming at new techniques and processes in ICT.

Brasília, Brazil 30 August 2012 - The Brasília Institute of Technology and Innovation - IBTI and Core Consultancy were the promoters of the 4th International SOA Symposium and 3rd International Cloud Computing Symposium held in Brasília, capital of Brazil, on 27 and 28 April, 2011. The event had gathered the largest number of world experts on the subject of IT in only one place so far. Private and public companies attended to the Symposium to share their experience regarding SOA and to adopt new concepts for their businesses as well.

To Claynor Mazzarolo, CEO of IBTI, the event served to bring to Brasília the role to discuss about these cutting-edge technologies. "We managed to bring the highest level professionals to this event. We can expect great achievements in the local market." According to Andre Toffanello, project coordinator of Core Consultancy, in the event was possible to realize the level of knowledge about SOA among the participants from different areas of ICT's production process, nationally and internationally. Events of this magnitude stimulate people's interest in new technological practices and promote tourism in the cities that they are being held in. Brasília was chosen to host the Symposium in 2011 because of the efforts that IBTI and Core Consultancy did to attract the experts of the technological business. Brasília is one of the cities in Brazil that invests most in IT and many industry professionals migrate to the city in search of opportunities and vocational courses.

Brasília Institute of Technology and Innovation - IBTI has laboratories with cutting-edge technology infrastructure, consisting of infrastructure for research and development in the areas of ICT. Both research and development are carried out, especially on Service-Oriented Architecture (LabSOA), Cloud Computing (LabCloud) and Mobile Technologies (LabMIN). The team of IBTI will be attending the 5th International SOA, Cloud + Service Technology Symposium in London.
